Youngstown Municipal Hospital Area Is Defined

Thirty-three townships, village of Chinook and town of Youngstown are included in territory.

In a letter received by Youngstown town secretary, from the Minister of Health, particulars of the area proclaimed as Youngstown Municipal Hospital District, is made known. Thirty-three townships including the village of Chinook and the town of Youngstown, are contained in the area allotted.

The territory is as follows: In Range 7, seven Townships, 21 to 30 inclusive. In Range 8, eight and a half townships, 21 to 31 inclusive and the south half of 32. In Range 9, seven and a half townships, 25 to 31 inclusive and the south half of 32. In Range 10, seven townships, 26 to 32 inclusive. In Range 11, three townships, 27, 28 and 29.

Delegation Wait On

Lorne Proudfoot, M.L.A.

A delegation of twenty-six representing Sibbald, Oyen, Excel, Cereal, Chinook and Youngstown, interviewed Lorne Proudfoot, M.L.A., at his home near Cereal, last Friday afternoon, and discussed with him matters relative to the improving of the main highway from Alaska west.

The delegation was given a cordial reception by Mr. Proudfoot, and his own contribution to the discussion showed he was familiar and in sympathy with the views of his visitors. The matter of improving the market road south of Oyen to the Fuego oil field, was also discussed.

At the conclusion of the conference, Mr. Thos. Lees, president of the Oyen Board of Trade, acting as chairman of the delegation tendered the thanks of that body to Mr. Proudfoot, for the reception and attentive hearing he had given them, while Mr. Proudfoot in reply expressed his pleasure in meeting so many of his constituents and gave his assurance that the requests made by the delegation would be brought to the notice of the proper department and that he would do everything he could to have them carried out.

Children 25 cents.

Fuego To Increase Capital Stock

A special meeting of the shareholders of the Fuego Oil Company Limited, will be held in the auditorium, Canadian Foresters Hall, 22 College Street Toronto, Ont., on April 17, 1930.

The purpose of this meeting is to consider and if deemed advisable, ratify the proposal to change and increase the capital stock of the company from 600,000 shares of par value of \$1.00 each to 3,000,000 shares without nominal or par value and provide for the exchange of five such shares without nominal or par value for each share of the par value of \$1.00 now issued. To consider and if deemed advisable, ratify the proposal to change the head office of the company from Toronto, Ont., to Oyen, Alta., and any other business that may be properly brought before the meeting.

Board of Trade Meets

At a regular meeting of Oyen Board of Trade held last Wednesday evening, a committee was appointed to interview Mr. Lorne Proudfoot, M.L.A., and discuss with him the desirability of getting the main highway from Alaska west, into better condition, and the adoption of a maintenance program which would give those in charge greater scope in their work.

A publicity committee reported that the signboards would be erected at an early date.

A short talk by Mr. A. O. MacArthur, managing director of the Fuego Oil Co., proved most interesting to the members present. He reported that it is the intention of the company to move their head office from Toronto and establish it at Oyen. Plans are being completed to increase the capitalization of the company to \$3,000,000, and shares split from one to five. Work on No. 2 well will be commenced in the near future, and the erection of a small refinery is now being planned for.

The next meeting of the Board of Trade will be held on Wednesday, April 9.

Women of Province Will Present Mrs. McKinney's Portrait

The women of the province are full of enthusiasm over their project of having the portrait of Mrs. McKinney painted and presented to the Legislative Building at Edmonton, and hope to have this accomplished before the end of this year. Mrs. McKinney has been chosen for this honor on account of the fact that she was the first woman to be elected to any Legislative Assembly in the British Empire, when in 1917 she was chosen to represent the constituency of Clarendon.

The arrangements are in (Concluded on page 8.)

IN LIGHTER VEIN

There's "Gold" In The Golden Rule

A heading in a business magazine reads: "There's Gold In The Golden Rule," and the accompanying article proves it. There is no doubt that following the Golden Rule, in business as well as out of it, in the long run will be more profitable than otherwise, and by this we mean materially profitable. There is a principle recognized by modern business that the business man, to be permanently successful, must contribute to the profit and welfare of those who deal with him from as much as he gets well as to those to whom he sells. And in a measure, this is recognition of the Golden Rule.

But here comes the rub. Is the Golden Rule observed, even to such a limited extent, for the test or for the "gold" which may be mined from it. Is it observed because it is the right thing to do or because it is the more expedient, the more profitable thing? Are we to "do unto others" from pure delight in the doing, or because we wish to have them do the same to us? The real reality, and force, and advantage of the Golden Rule lie in our attitude toward it. Its efficacy is in itself and in what prompts us to practice it.

Just to follow the Golden Rule because there is "gold in it," would be much the same as being honest because it is the "best policy." Neither impulse would rate high among the things considered admirable. To follow the Golden Rule because of a short-sighted desire to secure success in our dealings with our fellows and because we wish to be and to do right, is in the highest degree commendable. But to follow it merely or chiefly because "there's gold in it" is—well, not something we would care to boast about. The greatest profit which comes from living the Golden Rule cannot be set down in dollars and cents.

Throughout Western Canada our people have very largely accepted and adopted the principle of co-operation, and we are convinced that the relation and business. Unfortunately, it is not quite so generally accepted and acted upon in other community relationships. The question, therefore, naturally arises: Has this acceptance of one of the principles found in the Golden Rule resulted from a belief that "there's gold in it," rather than from a conviction that co-operation is indeed the better way for all concerned? Have we established, and are we maintaining, our great co-operative enterprises solely for the dollar and cent, rather than for the sake of our people earnestly striving to, in this way, make some contribution to the welfare of others?

Many fine and lofty sentiments—the sentiments of the Golden Rule—have been uttered by advocates of co-operation, and we are convinced that scores of men and women have joined co-operative organizations, not because they felt that themselves would reap any particular benefits, but because they felt such organizations would be the means of benefiting others and the country as a whole. They are practicing the Golden Rule because they believe it to be right, not because there may be some "gold" in it for them.

And if co-operation live and continue as a vital force in the life and activities of this country, if it is to grow and develop as a great co-operative influence and force, not only in its economic sphere but in all our community life, it must be through general acceptance of the view, and its practice in everyday life, that selfishness is wrong and unselfishness is right; that the welfare and happiness of others is our concern as well as theirs; that the Golden Rule is to be practised not because there is "gold" in it for us, but because it is the only correct rule by which to measure our lives and acts; that we must be honest with each other, not because it is "the best policy" but because it is right; if we expect others to be honest to us in our convictions, we must likewise recognize and believe in the honesty of convictions entertained by others.

True co-operation is founded on the Golden Rule. It is its underlying principle. It is the only basis upon which our great co-operative organizations can safely build, not because there is "gold" in it for anybody, but because it is the only safe rule for human conduct and intercourse.

Wheat Sales Affected

Eating Habits Of Those Who Desist Slenderness, Is Held Responsible

The modern feminine desire for slenderness, according to Professor James L. Boyce, of Cornell University, has altered market standards of long standing, cut the consumption of bread by 20 per cent, and considerably affected the wheat sales of this world.

Doctors, nurses, schools and even beauty parlors have helped to bring about these changes, the professor said in an address recently. Meat consumption also has declined, those in search of necessary vitamins preferring oranges, grapefruits, pineapples, lettuce, tomatoes and cantaloupes.

"All these changes in customers' food habits can be considered as market developments," Professor Boyce said. "The consumer is the most important, cut the people concerned with marketing."

To Study British Methods

Chinese Officers Will Learn How "Big Time" Navy Is Run

Twenty Chinese naval officers and cadets have gone to Great Britain to study British methods of running a "big time" navy.

They are making the trip at the invitation of the British Government, and will remain about two years.

The officers in the party expect to enter Greenwich Naval Academy and take the same course in tactics as British students. The cadets, however, must first spend some time on various naval vessels to learn the rudiments of British naval practice.

Makes Breathing Easy. The congested, sore throats and headaches and struggle for breath, too familiar evidence of asthmatic trouble, cannot be cured by Dr. J. D. Kellogg's Asthma Remedy. This is the famous remedy which is known far and wide as the complete effectiveness even under the most desperate conditions. It is untried, experimental procedure even with one with many years of strong service behind it. Buy it from your nearest dealer.

Insurance Agent: "Good gracious Mr. Kinkadee, this is your third accident within a month!"
Mr. Kinkadee: "Yeah — ain't I lucky?"

Almond for Filling Hair.

Apple Trees For Prairie Farms

Sixteen Varieties of Apple Found Suitable For the West
After fifteen years of seed planting the experimental work of the Dominion Department of Agriculture has developed sixteen varieties of apple trees suited to the climatic conditions of the Prairie Provinces. Of these varieties, two have been graded "very good" and four "good." Horticultural experts point out, however, that it will take several more tree generations to evolve the ideal species. Prairie farmers can help in this work by getting seed from the Experimental Station at Morden, Man., for planting in their own gardens.

DO YOU FEAR A HEARTY MEAL?

Dr. Williams' Pink Pills Will Tone Up Your Stomach Making Medicine a Pleasure

Are you afraid of meat? Does eating distress you? Would you rather digest your food in a condition of many due entirely to indigestion. There can be no perfect digestion—hence no enjoyment of meal-time—unless you have rich, strong blood. This pure blood is necessary to tone up your stomach and make it capable of properly digesting the food.

Many so-called stomach remedies merely try to digest your food for you. That is a mistake—nature should do it. That is why the best results are bound to follow. Tone up your stomach by driving out the poison of indigestion. Make new rich blood and your stomach and digestion will soon be normal—meals will once more be a pleasure.

The one sure medicine to enrich the blood, restore strength and banish stomach trouble and indigestion is Dr. Williams' Pink Pills. Concerning them Dr. Wm. C. Knapp, of Brussels, Ont., says:—"For years I suffered with indigestion, headaches and dizzy spells. I tried a great many so-called remedies without result. As a farmer's wife with three little girls, it was almost impossible for me to get my meals. I then turned to my work. I suffered so much that I was actually afraid of the use of Dr. Williams' Pink Pills, and although I had lost faith in ever being well, I purchased a supply and began taking them. Gradually my indigestion and headaches left me. My appetite improved and soon I was able to enjoy my meals. I gained in weight and my health in general is better than it has been for years. I owe much to Dr. Williams' Pink Pills for their relief of me of all my misery."

You can get these pills from any medicine dealer or by mail at 50 cents a box. Write to Dr. Williams' Medicine Co., Brockville, Ont.

New Species Of Whitefish

Newly Discovered Member Of Finny Tribe Found In Manitoba

Discovery of a new species of whitefish in the Red River delta, announced by A. Bajkov, of Manitoba University. The new species has been named *Coregonus Odonoghuei* in honor of Dr. C. H. O'Donoghue, formerly of the faculty of Manitoba University. The newly-discovered fish is common in Clear Lake. It lives at a great depth during the summer, coming to the surface only in the spawning season.

The worms that infest children from their birth are two kinds, those that find lodgment in the stomach and those that are found in the intestines. The latter are the most destructive, as they cling to the walls of the intestine and if not interfered with work havoc there, Miller's Worm Powders dislodge both kinds and while expelling them from the system serve to repair the damage they have caused.

Covered Long Distance. Walter E. Davidson, carrier on a rural route from the post office at Rustville, Indiana, for 20 years, received results in his career. During his service, Davidson wore out seven autos, nine horses, two wagons, and two sleighs, and travelled approximately 220,000 miles, a distance only 1,776 miles short of nine trips around the world.

A Matter Of Opinion. It is announced that Ontario and Quebec are to have "new penitentiaries which will be models for the world." This brings to mind the presentment some years ago of a Brampton, Ontario, grand jury, in which it was stated that conditions at the local jail were such as to make it "one of the most desirable places of residence in the city."

Imperial Agricultural Conference Arranged

First Meeting To Be Held In South Africa In 1932

Another link is being forged in the chain of Empire unity. To the present Imperial agricultural meetings will be added an Imperial agricultural conference, and the first meeting will take place in the Union of South Africa in 1932. This conference will meet every second year.

A tour of New Zealand by farmers from England, Canada and South Africa provided the opportunity for deciding on the Imperial conference. Lord Bledisloe, who has been called Imperial leading farmer, and who has come to New Zealand to assume the governor-generalship, addressed a conference of the visiting farmers and representatives of farmers in this great agricultural dominion recently.

Lord Bledisloe called the present meeting a landmark in the history of the empire. He stressed the vital importance of uniformity in the production and sale of agricultural products if a settled, continuous market for these products was to be secured.

The British Empire Producers, Empire Marketing Board and similar organizations will be asked to circulate propaganda on behalf of empire agricultural products; ensure preferences will be further discussed, and information will be gathered so the next conference can study financial and marketing problems of the various agricultural organizations for farmers, as well as the extension of foreign markets.

Persian Balm is inevitably chosen by discerning women. Delightful to use. Subtly fragrant. Cooling and refreshing. It imports a rare perfume to the complexion. Invulnerable to sun-burning and makes you beautiful. Whiter, smoother, and more charmingly white. Tones and stimulates the skin. Keeps it young and alive. Protects the tender skin of the child and is excellent for the father as a hair restorative and cooling shaving lotion.

Mark Twain's Immortal Boys

Last Survivor Of Famous Quartette

Dead In Seattle Recently
"Huck" Fin, Tom Sawyer, Mark Twain and Erastus Finn—kids who used to play together in Hannibal, Mo., years back—are all gone now.

The last to go was Erastus Finn, who was not as well known as the others, made so famous by Mark Twain. Ninety-five years old and a veteran of the civil war, Erastus Finn died in Seattle, a victim of pneumonia.

In recent years the old man loved to recall memories of his boyhood days when he and a whole host of "Huckleberry" and Samuel Clemens were friends of Tom Sawyer.

"Huck" Finn died a few years ago in Eugene, Ore. He was 91 years old now, are Mark Twain's immortal boys.

Powerful Medicine.—The healing properties in six essential oils are concentrated in the balm. Dr. Thomas' Electric Oil, forming one of the most beneficial liniments ever offered to the use of man. Many testify as to its power in alleviating pain, and many more can testify that they owe their health to it. Its wonderful power is not expressed by the small price at which it sells.

Times will not be much better so long as the new model of an automobile creates keener interest and invites closer inspection.

Ed—"How did you find your wife when you got home last night?"
Ed—"Just as nice as pie."

Minard's Will Stop That Toothache.

Town Planning Advantage Shown

An Attractive Community Depends Greatly Upon The Appearance Of Its Streets

The following advantages that accrue from a systematic effort at town planning are given by Mr. Stewart Young, of the Town Planning department of the Saskatchewan Government.

The general appearance of any community is most important, and if ways lead means by which the agreeable surroundings can be produced are analyzed, it will be found that a attractive community depends greatly upon the appearance of its streets.

The appearance of a business street may be marred by the use of the sidewalks for storage or advertising purposes. Curb gasoline pumps do not add to the appearance of any street and should be prohibited. Electric light and telephone wires, when placed on a street tend to give it a ragged appearance. They should be placed underground in conduits or on poles.

The appearance of the residential streets of any community reflects the moral attitude of the citizens. Every community should have a definite policy in respect of tree planting on residential streets.

The boulevard system should be used. Usually a sidewalk four and a half feet in width placed at a distance of about two feet from the street line with a graded roadway about twenty feet wide, in addition to the trees, will accommodate all traffic on residential streets.

The intervening space between the sidewalk and the street line should be planted with trees spaced about twenty feet apart, and alternated slow and fast growing.

Several advantages are to be gained by this method of planting. Fast growing trees mature in a period of from twenty to twenty-five years, at the end of which time the trees will have reached a stage where they are most useful. Moreover, insects seldom attack more than a variety of tree in a season. The result is obvious where a street is planted so tired with any variety of trees.

Deliver Tea By Plane

Tea Freight, Begun On Owen-Cart, Ends With Trip On Aeroplanes

It is a far cry from the slow-moving, primitive, high-wheeled cart, hauled by oxen along the roads of Ceylon, to a speedy aeroplane in the winter sky over Lake Erie, and many of the people of Pelee Island are planning tea parties to be held by air, that jogged along in an cart under a tropical sun in Ceylon only a few weeks ago.

The Owen-Cart Company, because of the freeing over of Lake Erie, between Pelee and the mainland, recently shipped several hundred pounds of tea by air, in order to replenish the diminishing stock of a certain grocer on the island.

Test Is Satisfactory

The annual retort of the herds in the Fraser Valley, B.C., for T.B. is being carried on at present by about twenty veterinarians. More than half of all the dairy cows in the province (55,000) are located within this area and in the last test only three quarters of one per cent reacted.

New Municipal Bridge

The cities of Winnipeg and St. Boniface are conferring on the question of a new inter-municipal bridge to replace the present Norwood bridge.

Something To Leave Alone

Guest Towels Seem To Serve No Useful Purpose

It has been said that "actresses may happen in the best of families." Another adage is: "Why the guest towels?" Every family may not have an actress, but nearly every family has a set of guest towels. Why? Nobody uses them not even the guests.

We all know the lineup of towels on the rack near the bathtub. There are one for the family and one for the guests. No matter whether there are any guests or not, there must be guest towels.

The family dare not use them, and the guests, usually trained in the same manner in their own homes, also refrain for no other reason than "What is good enough for the host is good enough for me."

Rayon is not suitable material for paper-making, tests by government specialists indicate.

RESEARCH WORK FOR THE BENEFIT OF AGRICULTURE

Regina.—Recommendation will be made by the Agricultural Committee of the Canadian Chamber of Commerce, following a session here, that research work in Canada be extended in all the provinces of Canada, and that further methods be adopted by the Canadian Chamber of Commerce to bring the results of such research to the knowledge of individual farmers as far as can be done.

A second resolution was passed that "the conference suggests to the Canadian Chamber of Commerce that a national bureau of agriculture be established in the Canadian Chamber of Commerce, which bureau would be completely directed by one or more recognized experts, whose duties it would be to study the whole question of agricultural production, marketing, research, education, grading, standards, etc., and to make available to the agriculturists and to business, findings and recommendations which because of their authoritative, impartial and thorough nature would command themselves as sound and reliable procedure and thus inspire confidence on the part of our producers, middlemen and consumers."

In this connection the Regina conference will recommend to the Agricultural Committee of the Canadian Chamber of Commerce that this committee recommend in turn to the Dominion Government that a committee be set up to study agricultural problems in Canada, members of the body to be men familiar with the economics of agriculture.

"What's Ahead for Agriculture in Canada?" was the question upon which the National Agricultural Committee of the Canadian Chamber of Commerce based its discussion at the opening session of a meeting at the Saskatchewan Hotel, Col. Robert McEwen, London, Ont., presided.

Representatives attending the meeting were welcomed by Col. J. H. Woods, Calgary, president of the Canadian Chamber of Commerce; and by George H. Barry, K.C., Regina, Saskatchewan vice-president of the Canadian Chamber of Commerce.

Hon. J. D. MacGregor, lieutenant-governor of Manitoba, took the opening address, in his opinion, the day of \$1.75 wheat had passed, and emphasized his opinion that the future of the prairies must enter diversified farming. The climate and the various soils of the prairies were adaptable for the growing of forage crops and thus the possibilities for live stock were great.

"Pay your taxes with your stock and have the returns from your grain crop as velvet," he said.

Mr. MacGregor was the winner of the grand championship at the Chicago International Exhibition for 1912 and 1913, and was known across the continent as one of the leading stock men of Canada and the United States.

George H. Barry, K.C., spoke of the opportunity for service provided through the medium of the Canadian Chamber of Commerce.

Amendment Is Lost

House Of Commons Defeat Amendment To Bill Providing For Divorce Courts

Ottawa, Ont.—The House of Commons defeated the amendment of Thomas McMillan, Liberal member for South Huron, to the Woodhouse Bill providing for divorce courts in Ontario, by twenty votes. The vote stood: 88 against 108.

The amendment expressed regret at the spread of divorce in Canada, and advised a campaign to foster the idea of the sanctity of the home in the Dominion.

After the vote on the amendment, there were calls for a vote on the main motion. Mr. Speaker announced that as the private members' hour had expired, it would not be possible to take this vote until another day.

George Spotton, Conservative, North Huron, objected, so the vote was put over until another sitting.

Handit Gets Heavy Sentence
Hamilton, Ont.—Fred Brooks, bandit, was sentenced to seven years in the penitentiary by Judge Macdougall. He is also to receive 30 lashes in three instalments. He pleaded guilty to armed assault.

Millions For Good Roads

Saskatchewan Government Has Ambitious Program For This Season

Regina, Sask.—Nearly seven million will be spent on Saskatchewan roads this season, it was announced in the legislature by Hon. A. C. Stewart, K.C., Minister of Highways, during the course of the debate on the budget.

The total of \$6,852,396 is to be divided as follows: On trunk highways, \$2,963,805; gravel surfacing, \$3,372,801; sandy grading, \$896,000; colonization roads, \$120,000. The latter refers to roads in newer districts of the province, part of the scheme of the new Anderson government.

Mr. Stewart assured the members that there was no intention on the part of the government to create a highways commission or of abandoning the present department of highways. Roads of the province, their construction and maintenance would remain as they had always done, under the direct control of the minister.

British Coal For Canada

Tonnage Chartered For Trade Says British Minister Of Employment

London, Eng.—Very considerable orders for British anthracite and soft coal have been obtained in Canada, said Sir H. J. H. Thomas, royal privy seal and minister of employment, in the House of Commons.

The minister was questioned by Sir Kingsley Wood, Conservative member for West Woodwich, who asked if there had been time to secure westbound cargoes for the grain boats coming from the Dominion. Sir Kingsley suggested that the most natural article of cargo exchange.

"Yes sir," replied Mr. Thomas. "The 'm' route is that very considerable orders for British anthracite and soft coal have been obtained in the Dominion and in the United States. A substantial volume of tonnage has been chartered for this trade to come to the Dominion through the St. Lawrence to navigation."

Tenth Anniversary Of Suffrage Celebrated

Luncheon Party In Forty-Two States Joined By Radio

Washington, D.C.—The National League of Women Voters on March 15th celebrated the tenth anniversary of suffrage with a chain of luncheon parties stretching across the United States.

The birthday parties were arranged in 42 states. The luncheon tables were joined by a nation-wide radio hook-up, with Carrie Chapman Catt, silver-haired, 70 years old, the grand old lady of women's suffrage, addressing the thousands of celebrants.

The birthday celebration was the first of a series planned for the next few months in recognition of the first decade of women's vote in government. The celebration will be held in Louisville, April 18.

Will Not Resign

Hon. Dr. Godfrey Will Stand Pat Over Famous Postscript Episode

Toronto.—Hon. Dr. Forbes Godfrey, Minister of Health for Ontario, has reiterated his stand that he will not resign because of the public rebuke administered to him in the legislature by Premier G. H. Ferguson, over the now famous "postscript episode." He also denied a rumor that he will take a long vacation. "Both are a pile of dreams," he declared.

It was for his action in adding a postscript to a letter written to a constituent of his in which an application for a mother's allowance, made by a woman residing in Long Beach, was referred to the "postscript episode."

The postscript reads as follows: "See her if you can and get her support the 30th (election) day. We will be able to take more time with the case."

Purchase Earncliffe

British Government To Spend \$125,000 For High Commissioner's Residence In Canada

London, Eng.—The governmental estimates for the coming year, tabled in the House of Commons, provide the sum of \$125,000 for the purchase of the site of the British high commissioner's residence in Ottawa, "Earncliffe."

Buildings in use by the diplomatic mission will prove rather costly this year. The new Washington embassy with account for the expenditure of \$150,000. The old embassy, destroyed by fire, will be rebuilt at a cost of \$350,000. The embassy at Moscow will cost \$160,000.

Airmen Reach Railway

Vance and Bladale Complete Long Trek Southwest

Winnipeg, Man.—Jim Vance and Brian Bladale, Northern airmen, wintered at Baker Lake, off the west coast of Hudson Bay, have completed a 100-mile trek southwest by dog-team. They reached the fringe of civilization March 26, when they entered Gillam, which is 327 on the Hudson Bay Railway. The farthest north point to which the "Muskeg Limited" is operating along the line to Churchill.

SHORT LINE TO THE PAS WILL BE OPENED SOON

Winnipeg, Man.—Construction work on the Sturge-Hudson Bay Junction branch line of the Canadian National will be finished about May 18, and the line will be turned over to the operating department on that date. An announcement to this effect was made by A. E. Warren, western vice-president of the Canadian National.

A very considerable saving in time and distance between Southern Saskatchewan and the Hudson Bay Railway will result with the completion of this line and the opening of it for regular freight and passenger service between Regina, Moose Jaw and other southern points in Saskatchewan there will be a lessening of 24 miles over the existing route through those centres to the Pas.

Intermediate points such as Melville and Yorkton will also be brought considerably nearer to The Pas and the Hudson Bay Railway. Until the Sturge-Hudson Bay Junction line goes into operation the route from Regina to Hudson Bay Junction is via Swan River, a distance of 420 miles. The distance by way of the new route which lies through Melville, Yorkton and Cadorna will be 325 miles.

Passenger and freight train services are now under consideration by the departments concerned and it is not expected that an announcement on train service will be made for a few weeks. The Sturge-Hudson Bay Junction line was one of those included in the three-year branch line program which was passed by parliament in 1927. Although in practically the last item on that program to be completed the date upon which it is to be turned over for operation is more than six months ahead of that set by the bill.

Severe Earthquake In Orient

Victoria, B.C.—Superintendent P. Napier Denison, of the Gonzales observatory here reported that a severe earthquake had been recorded on the seismograph with its centre somewhere in China or Japan. The quake lasted for 1.21 seconds and continued for three hours.

France Plans Grand Reserve

Paris.—Establishment of a government reserve supply of grain to assure a proper amount for the population in times of emergency and to allow a certain government control of domestic prices has been approved by the Chamber of Deputies.

West Grows Airminded

Montreal.—The maximum penalty of 14 years in the penitentiary was given Robert A. Watson, an confessed to a series of armed robberies in Montreal during the winter; when he appeared in police court here.

Watson called himself the "Lone Wolf" and robbed some half dozen managers of chain stores and other premises during his career here.

NEW APPOINTMENT

Will Purchase Training Glider and Commerce Flying School

Calgary, Alberta.—Calgary, first Canadian glider flight was made, inaugurated as the place where the bids fall to become the first city in the Dominion with two glider clubs. The clubs are the Calgary Glider Club, and H. H. Keayon, vice-captain, eight directors of the Foothills Glider Club were elected by a meeting of two enthusiasts at the municipal airport. Plans are to purchase a training glider immediately and commence flying early in the coming season.

DEVELOP PUBLIC OPINION ALONG PEACEFUL LINES

Ottawa, Ont.—Contribution of money to Canadian universities for establishment of chairs in international relations is a field in which it might be better for the Dominion Government to intervene, believes Dr. O. D. Skelton, under-secretary of state for foreign affairs. Dr. Skelton spoke before the House of Commons committee on industrial and international relations.

Overseas Wireless Phone

Direct Wireless Telephone Service Between Canada and Britain Is Contemplated

Ottawa, Ont.—Confirmation of the statement of Hon. H. B. Lees-Smith, British postmaster-general, respecting the contemplated establishment of a direct wireless telephone service between Canada and Great Britain was obtained from officials of the Department of Marine. So far, however, the matter has not gone beyond the negotiation stage.

When the system is established it will operate through the Marconi system at Drummondville, Que., from where the transmission will be direct to Rugby, England. This circuit has been operating experimentally for the last year. It was employed recently in the broadcast of the King's speech at the opening of the naval disarmament conference. Officials were unable to say when the system will be inaugurated commercially.

Opened Exhibition By Radio

Marconi Spoke From Genoa, Italy, To Sydney, Australia

Genoa, Italy.—Short radio waves cutting across the Atlantic, waves sent by Marconi from his station at Marquis Guglielmo Marconi, inventor of wireless, from his yacht Eletta here, to Sydney, Australia, to open the electrical exhibition there.

Marconi spoke across 11,000 miles to Director J. Fike, of the electrical association, reading a message which outlined what he intended doing later in the day—transmitting a small unit of power to Sydney in order to close a circuit there and light the electric lamps of the exposition.

Heavy Penalty For Robber

Montreal.—The maximum penalty of 14 years in the penitentiary was given Robert A. Watson, an confessed to a series of armed robberies in Montreal during the winter; when he appeared in police court here.

Watson called himself the "Lone Wolf" and robbed some half dozen managers of chain stores and other premises during his career here.

Calgary Has Glider Club

Will Purchase Training Glider and Commerce Flying School

Calgary, Alberta.—Calgary, first Canadian glider flight was made, inaugurated as the place where the bids fall to become the first city in the Dominion with two glider clubs. The clubs are the Calgary Glider Club, and H. H. Keayon, vice-captain, eight directors of the Foothills Glider Club were elected by a meeting of two enthusiasts at the municipal airport. Plans are to purchase a training glider immediately and commence flying early in the coming season.

TRADE TREATY WITH AUSTRALIA TO BE RETAINED

Ottawa.—Both the sub-amendment, calling for revision of the Australian treaty, and the amendment declaring that it should be abrogated, met with defeat in the House of Commons. The sub-amendment, which was moved by Hon. H. H. Stevens (Cons., Vancouver Centre), was defeated by a vote of 103 to 51. The amendment, which came from Robert Gardiner, U.P.A. member for Acadia, was even less successful. It was lost by 141 to 16.

Party lines were followed closely in the division on the sub-amendment. All the Conservatives present, and H. H. Ashford, Liberal member for St. John's, favored the Conservative proposal. Lined up against it were all the Liberals, Liberals-Progressives, Independent Liberals, Progressives and members of the U.P.A.

Support of the U.P.A. amendment came from all the Conservatives. The support of the U.P.A. amendment came from members of the U.P.A. party, Progressives, and one Liberal, which came from Robert Gardiner, U.P.A. member for Acadia, was even less successful. It was lost by 141 to 16.

Following defeat of the sub-amendment and amendment, the government motion to go into supply was declared carried. This motion was carried by a vote of 103 to 51. Some days but discussion of the Australian treaty has prevented its passage.

British Companies Interested

May Invest In Oil Fields and Later Build Steel Mill

Calgary, Alberta.—Laying down of a million dollar stock and oil-well drilling and equipment company in Calgary during the coming summer and later establishment of a steel mill in this city are two projects if the market proves sufficiently attractive are being recommended to the large British financial and manufacturing interests represented by R. A. Raymond. Mr. Raymond has spent some time looking over the market provided by the Turner Valley field.

While desiring to go out the names of the British companies which are interested, he stated that Canadian business is practically unlimited volume. It was pointed out that a merger of a number of well-known firms engaged in the iron and steel manufacturing industry may be formed with a subsidiary Canadian company to handle the business in the Dominion.

Wheat For Starving Chinese

Western Farmers Asked To Donate a Bushel Of Grain For This Purpose

Winnipeg, Man.—Pleas from far and wide for a bushel of wheat of starvation and millions more face a like fate during the coming year, have reached the title settlement of the province. The plea is for a bushel of wheat for a starving Chinese.

From business men and agriculturists of the province a plan to aid the people of the northern sections of China, where 3,000,000 persons have perished from hunger and privation.

The thousands of farmers of the western prairies are urged, in a resolution adopted at a meeting of the province, to donate one bushel or more of wheat each, and the railway companies of the Dominion are requested to arrange free transportation of this grain to the Orient.

Elected Party Leader

J. W. McDonald Is Chosen As Leader Of Liberal Party In Alberta

Calgary, Alberta.—J. W. McDonald, K.C., former mayor of Calgary, and prominent in public life of the province, was elected leader at the convention of the provincial Liberal Association.

The election was made on the third ballot, and Mr. McDonald will ascend to the post previously held by Captain M. T. Shaw, K.C., who was defeated by a vote of 103 to 51.

The race for leadership was close between Mr. McDonald and W. R. Horwood, of Edmonton, and H. Montague, of Westsaskatoon, who were the other candidates.

May Try Atlantic Flight

Friedrichshagen, Germany.—The huge German Dornier DO-X will attempt a flight to the United States this summer providing trial flights with motors from the United States to be installed this month prove satisfactory.

Topographical Map of Humboldt

Interesting Facts in Connection With Early History Of The West

Few people can resist the fascination of a modern map with its implication of travel and appeal to the imagination.

Particularly fascinating are the maps of Western Canada where changes are swift and continuous. A case in point is the Humboldt sheet of the sectional map of Canada embracing 4,300 square miles of central Saskatchewan between townships 33 and 40, ranges 15 to 20, west of the second meridian, of which the 7th edition since 1902 is now off the press of the Topographical Survey, Department of the Interior.

In very early days in the West, people travelled almost wholly by water. As the Humboldt area lies nearly forty miles from any water route it remained an unknown land except for occasional winter travellers until the construction in the '80's of the main line of the C.P.R. to the south, when Humboldt telegraph station became the halfway point on the stage routes between Qu'Appelle and Prince Albert.

On his way north to survey a portion of the Arctic coast, in December, 1836, Thomas Simpson travelled diagonally across this area. His approximate course and route is indicated by the line of the Canadian National Railway northwesterly. Taking observations by the way, as did most of those early explorers who had a working knowledge of surveying, Simpson appropriated the caribou intended for the winter fur trade, or returning empty to Winnipeg. Each day, places that had been the camping grounds of others were passed, the signs of soil being the careful freighters that formed a fire-place, the ridge poles left lying on the ground, the ashes of campfires and little enclosures for the squaws where smudges had been made against the assaults of the ubiquitous insects. Incidentally he mentioned that the telegraph line having been down for two weeks, he was unable to send a telegram from Humboldt.

About this time a surveyor was sent dollars for a telegram which took a month to reach its destination. More impressive than caravans of buffalo hunters and brigades of freighters must have been the sight of General Middleton's column of 800 men marching in April, 1862, from Qu'Appelle to the Saskatchewan and passing at Humboldt telegraph station, some six miles southwest from the present town of Humboldt, for a rest of two days. Ahead of the column rode Douglas's Scouts, the men whom were the surveyors who before and afterwards laid out lands all over this country. Their way lay along the stage-coach mail route which followed roughly the Canadian Pacific Railroad Langdon-Prince Albert line.

The romantic past of the Humboldt territory has been replaced by the practical present whose brigades and caravans are trains of automobiles and cattle eastward, and manufactured necessities and luxuries westward by way of eight railway lines that net the region.

The romantic past of the Humboldt territory has been replaced by the practical present whose brigades and caravans are trains of automobiles and cattle eastward, and manufactured necessities and luxuries westward by way of eight railway lines that net the region.

This might be a terse description of the terrain as it now looks except that, where not a building or farmstead stood at that time, and few even sixty years afterwards, nowadays the expanse is dotted with the homes of settlers who have gone into the tract since 1902.

Some years after Simpson, in the midsummer of 1872, the Sandford Fleming expedition passed across the tract on their way to examine the Yellowstone Pass for the C.P.R. and to report on the intervening and extending countries. Climbing the same hill from which Simpson obtained a view in 1836, the secretary of the expedition commented rapturously on

the roses, marigolds, golden rod, lilac, bergamot, wild tansy, blue-bells, huckleberries, and aspen in a profusion of colour that his impression was of an earthly paradise, but he says sadly, "Where hundreds of homesteads shall yet be, there is now one!" Yet the new map now shows on the area 4,275 homesteads exclusive of the towns and villages.

Those were the days of great buffalo hunting expeditions from Red River and the Hudson's Bay Company travelled together in a picturesque brigade, the men riding, the women driving the Red River carts, and the children general "chores" for the women. Captains and policemen were elected to preserve order, outposts set, laws made for the hunt, strictness enforced by fines or the destruction of the clothes and accoutrements of the offender, or by expulsion from the brigade, hunt over this very country has been vividly described as like the assault of light cavalry on an invulnerable foe, the dark moving sea of numberless buffalo. Even a few years ago there were traces of the buffalo brigade camps where the women and children prepared the dried meat and pemmican and dressed the hides after the children general "chores" for the women.

At the present time it is said that there is too much wheat in the world, too much wool in the world, too much rubber in the world. There is so much of each that the world price is affected, which means that the people who produce coffee, rubber, wool and wheat are not so well off as they once were. This is a fact that is considered profitable.

What is to be done about it? The articles referred to are regarded as necessities in the modern world and yet the demand for them is not sufficient to keep the price at a level that is required to meet costs of production. At one time in the world's history a gentleman named Malthus predicted that if the number of the people in the world were not kept to a certain level there would not be enough food for all, and the human race would face starvation. He argued the limitation of population. Instead of that coming to pass we have a world today in which limitation of production is scarcely discussed because there are not enough people to use the commodities that are being produced. It is true that the race might use more products if it had the means to buy, as illustrated by the fact that millions are said to be starving in China, although the world market is flooded with wheat. They cannot eat because they cannot buy.

There appears to be a first class problem here for everyone with a brain to think.

Would more people in the world produce better markets or would they merely depress the markets by producing more food?—Regina Daily Post.

Producer (interrupting singer at voice trial).—Does that end the first verse, miss?

Singer.—Well, I've got to where it says refrain.

Producer.—Good. Please do as it says.

Critic.—I'm afraid I'm going to tax your memory.

Mr. Bangs.—Good heavens, has it come to that now?

Rage Poisons the Brain and Will Shorten Your Life

Loss your temper and you shorten your life. Flying in a rage poisons the brain, strains the heart, unstrings nerves. A bad temper, good health cannot permanently go hand in hand. In the days of one-man organizations violent tempers were more common than they are today. In the modern organization the fiery-tempered individual is out of place. Harmony calls the machinery of business; discord casts sand into the gearbox. Temper kills teamwork. Therefore, for the sake of your own health and for the sake of the health of your business, don't let your temper get out of control. An uncontrollable temper is as destructive as an uncontrolled engine. —Forbes Magazine.

Needed the Water

Cooper had been standing in the cell with his fingers glued firmly over a leak in the water tank. "George," he cried, "you can take your hands off that leak now."

"Thank heaven," replied her husband. "Has the plumber come?"

"No," was the answer, "but the house is on fire."

Investments Abroad

Canadian investments abroad at the end of 1928 amounted to \$1,579,074,000, according to an official estimate. Of this amount \$874,628,000 was invested in the United States; \$131,910,000 in the British Isles, and \$573,535,000 in other countries.

W. R. DEVENISH
General Superintendent of the Canadian National Railways, Edmonton, who has been appointed General Superintendent of the Manitoba District, with headquarters in Winnipeg.

Requires Some Solving

Question Of Supply and Demand Is First Case Problem

At the present time it is said that there is too much wheat in the world, too much wool in the world, too much rubber in the world. There is so much of each that the world price is affected, which means that the people who produce coffee, rubber, wool and wheat are not so well off as they once were. This is a fact that is considered profitable.

What is to be done about it? The articles referred to are regarded as necessities in the modern world and yet the demand for them is not sufficient to keep the price at a level that is required to meet costs of production. At one time in the world's history a gentleman named Malthus predicted that if the number of the people in the world were not kept to a certain level there would not be enough food for all, and the human race would face starvation. He argued the limitation of population. Improve Your Turkey Stock

Turkey Approval and Banding Campaign In Saskatchewan

Recently compiled records of the 1929-30 turkey approval and banding campaign, conducted by the Poultry Division of the Saskatchewan Live Stock Branch, reveal that 2,172 turkeys were approved and banded. Despite the fact that a number of the birds were down in weight because of the poor growing season last summer, the results show a very good improvement with respect to the number of birds graded as "A" or "B" with a corresponding decrease in the number of grade "C" birds.

Many breeders have disposed of all the approved turkeys which they had for sale. A few breeders are offering at greatly reduced prices, some good turkeys which are capable of improving the type, conformation and plumage markings of many flocks throughout the province.

For information as to the location of these turkeys, together with prices, those interested may communicate with H. W. McLean, secretary of the Saskatchewan Turkey Breeders' Association, Poultry Division of the Provincial Live Stock Branch, Department of Agriculture, Regina.

Have Made Good Progress

Reindeer Herd Will Remain In Northern Alaska During Summer

The drive of 3,000 reindeer from the west coast of Alaska, eastward to the delta of the Mackenzie River in the North-West Territories of Canada, is progressing favorably, and in March the herd was expected to reach the basin of the Colville River. In northern Alaska, where it will remain during the coming summer, rearing of the calves will be completed. A word of the progress of the reindeer, purchased by the Dominion Government, was brought by Mr. A. E. Porsh, of the North-West Territories and Yukon branch of the Department of the Interior, who recently returned from the herd. While in the north, Mr. Porsh selected the animals to be included in the movement, and saw the drive well under way before he returned to Ottawa.

Early this spring, Mr. R. T. Porsh, of the North-West Territories and Yukon branch, will go north by aeroplane, to complete arrangements for the reception of the herd in the beginning of 1931. Materials for the erection of the corrals, huts, and other structures, have already been shipped north.

How He Figured It

They were talking rather confidently about the drive. "But, surely," said Wilson, "you and your wife are as one?"

"Of course, I know we should be," said Wilson, the impetuous husband, "but we are not. As a matter of fact, we are ten?"

"Well," replied the other, "how do you make that out?"

"Well," said the other, dropping his voice a little, "she's the one and I'm the mother."

Willie—"I must say I enjoyed the party, Mrs. Smith."

Hortas (delighted).—"Honest, you little darling!"

Willie—"Yes, even though I hated it. Mother would spank me if I didn't."

Strong Minded Children Choose Careers Early

And Usually Stick To Their Decision Says Educationist

"When I grow up, I'm going to be a physician" or "I'm going to be a pilot" or "I'm going to be a nurse" are the kind of statements that are heard from the mouths of many children. "So maintains the boy next door. 'An' when I grow up, for that matter."

Down in New York, lives an educationalist, one Professor Harry Dexter Kilham, of Teachers' College, Columbia University, who maintains that such a speech, from a strong-minded child, indicates that in all probability the child will abide by his decision when grown up.

Dr. Kilham recently completed a vocational study in New York which showed that 14 per cent. of policemen and 12 per cent. of nurses decided upon their careers before the age of 12. His study revealed that almost most boys and girls have decided upon their careers before the age of 12. His study revealed that almost most boys and girls have decided upon their careers before the age of 12. His study revealed that almost most boys and girls have decided upon their careers before the age of 12.

Other results showed that nurses are far more interested in their profession than teachers. They were asked what activity they would devote most of their time to if they had a million dollars and did not have to work. The answers to this question were: Nurses, 33 per cent.; teachers, 23 per cent.; and so on. A scale of interest, showed that 33 per cent. of nurses had a maximum interest in their work as against 19 per cent. of teachers.

It was found that the ages at which interest cropped out in policemen, nurses, and teachers, were about the same. The scale of interest, showed that 33 per cent. of nurses had a maximum interest in their work as against 19 per cent. of teachers.

Canada Week In Bristol

People Of British Isles Becoming More Familiar With Canadian Products

Mr. Douglas MacIsaac, Canadian Government Trade Commissioner stationed at Bristol, has evidently left no stone unturned to make the special "Week" planned to give the housewives of Bristol an opportunity of becoming more familiar with Canadian food products, a success. This special "Week" terminated on Saturday last, and, according to the "Evening World," it was successfully inaugurated by the Lord Mayor of Bristol, who, together with other civic officials, members of the Press and the Bristol Provision Trades Association, were guests of the Canadian Government at luncheon at the Grand Hotel.

Early in the week, Hon. Mr. Buckle, Minister of Agriculture for Saskatchewan, wired as follows to Mr. Cole:

"In Saskatchewan we are greatly interested in your efforts to increase the sale of Canadian farm products in the West of England, and express our appreciation. In the forward development of our agricultural policy recognition is given to the fact that high class products as well as volume are demanded in the markets of the British Isles, and it is our ambition to meet such requirements. Reciprocal trade between the Empire is a most worthy objective and we trust Canada Week in Bristol will be a most successful one."

To which Mr. Cole replied: "Many thanks for cable good wishes. Over 400 Bristol stores will be stocking displaying and selling Canadian food products during coming Canada Week. Every co-operation received from Lord Mayor of Bristol, wholesale and retail trade associations and other bodies."

The Bristol Times and Mirror has the following to say: "It seems that Canadians, with two or three hundred years' experience of outdoor life, have a keen sense of thousands of people in this country willing to buy their goods if they knew what names to say at the counter, and the shop is to be run with a view to familiarizing people with the actual brand names. It is said the British people are becoming more and more familiar with the names of the products."

Auto Horns Banished

Finland and Norway Decide It Is Unnecessary Noise

Finland has made a start toward the suppression of city noise by forbidding the use of motor horns in the town of Aabo which has demonstrated that the horn is no more necessary than the automobile. It was an act of state, a car-horn ban or a hay wagon. News of the demonstration in Finland and Norway, and the Royal Automobile Association of Oslo, has proposed that in every city of that kingdom the use of the horn should be done away with, and the attention it involved redirected to skillful driving.

News of the demonstration in Finland and Norway, and the Royal Automobile Association of Oslo, has proposed that in every city of that kingdom the use of the horn should be done away with, and the attention it involved redirected to skillful driving.

Finland and Norway Decide It Is Unnecessary Noise

Finland has made a start toward the suppression of city noise by forbidding the use of motor horns in the town of Aabo which has demonstrated that the horn is no more necessary than the automobile. It was an act of state, a car-horn ban or a hay wagon. News of the demonstration in Finland and Norway, and the Royal Automobile Association of Oslo, has proposed that in every city of that kingdom the use of the horn should be done away with, and the attention it involved redirected to skillful driving.

Geographical Features Named After Indian Chiefs Are Numerous From Coast To Coast

Geographical features named after Indian chiefs are numerous in Canada. It is exactly 100 years since the first appearance on a map of the name Petawawa. According to the records of the Geographic Board of Canada, Petawawa River occurs on a map made in 1829 by Colonel John By, who built the Rideau Canal.

The name is now applied to the military camp on the Petawawa River in Renfrew County, Ontario. The Indian chief, Petawawa, is said to have hunted in the region and the meaning of the name is "the sound is coming" or "approaching sound."

In some cases an Indian has been commemorated by a name given him by the whites. There are several examples of this nature in New Brunswick, where Burnaby River, Barting River, Cain River, and Taxis River bear the names of Indian chiefs who once lived on these streams.

In Quebec the town of Donnacona recalls the "Lord of Canada," who was taken to France by Jacques Cartier, in 1535, and died there. In Manitoba, Pegus port office takes its name from a Saulteaux chief, who, in 1833, was granted an annuity of \$25 by the Hudson's Bay Company. He was a friend of the colonists of the Red River Settlement (Winnipeg).

In Saskatchewan, Cutknife Hill, according to tradition, commemorates a farce which was killed on it in battle with the Cree. In Alberta, Crowfoot Village, Mekoato railway station, and Chiniki are named in honor of the north of Indian chiefs who on the coming of white men ended their title to vast areas and fought tribal warfare. Crowfoot, head chief of the Blackfeet, was a head chieftain, not a warrior, who kept his tribe at peace with the whites. Mekoato, a Red Crow, head chief of the Southern Blackfeet, was loyal throughout the 1830s rebellion. Chiniki was a Sisseton Indian chief.

Kinaskis pass, in the Rockies, commemorates an Indian who made a wonderful recovery from the blow of an axe. Pouce-Coupe River, in Alberta, and the name of the Columbia bears the name of a Beaver Indian chief who settled on the river with 500 followers.

The name is French for "cut thumb." In British Columbia, Kinak Lake, an expedition of the Columbia River, was so named in 1866 by Walter Moberly, C.E., after a Shawanup Indian chief who was of service to him on an exploratory trip. Nicola Lake commemorates an Indian chief whose other name, Neistemoosin, meaning "wailing grizzly bear," well describes his character.

To Grow Early Potatoes

R.C. Association Imports Certified Seed From Prince Edward Island for the purpose of supplying the prairie markets with early potatoes, some fine farmers on Lulu Island, British Columbia, have formed the Richmond Early Potato Growers' Association. Each member will put in a special plot of two or three acres of early potatoes, which will be planted simultaneously at the end of the present month, so that they will be ready for market at the same time. Irish Cobbler has been selected as the variety to use and a car-load of certified seed has been imported from Prince Edward Island.

Pankhurst Statue Unveiled
A statue of Mrs. Emmeline Pankhurst, who led the movement for the enfranchisement of women in Great Britain, was unveiled in Victoria Tower Gardens, Westminster, in the presence of many of the leading fighters in the suffrage cause. Many political leaders were present and Stanley Baldwin, the former Premier, performed the unveiling ceremony.

"Sing us a song."
"I dare not with all these people."
"Pooh, they won't listen." — Muskeles, Vienna.

W. N. U. 1831

Here To Give Service

Paper As Community Affair Has Most Difficult Task

A newspaper is different from any other business. It is a community affair. It is for service to the people, and not for any individual. The job of a newspaper is first to provide news to those who subscribe to it, and then to those who do not. The paper they pay in advance because they want news, and the newspaper's part of the contract is to provide the news. That is why newspapers find it hard to comply with requests by individuals to leave out items of news. If newspapers left out unpleasant news to individuals every time they were asked to do so, the day would eventually arrive when there would be no newspapers.

In the case of court cases the newspaper treats such as cases, not as individuals. There is no more animosity in a newspaper reporting legal proceedings than there is in police or other public officials doing unpleasant things to individuals, such as taking them before the courts. It is part of the job in each case. In the instance of newspapers, as with police and other officials, care is always taken that the innocent shall not suffer.

Newspapers have to be trusted to do the right and fair thing as far as possible at all times, consistent with advance to the clear and straight path of duty. The task is always a difficult one, and the public should realize this.

(By Anabelle Worthington)

Lingerie detail presented in egg-shell crepe collar of a crepe silk in dark blue background printed in green, is decidedly chic to wear. The eggshell crepe appears again in style turn-back cuff.

Neat blouse that can be had in sizes 36, 38, 40, 42, 44 and 46 inches bust, achieves a most unusual slenderizing effect through the moulded long-waisted bodice, and fitted circular skirt. A narrow belt indicates normal waistline, which is generally becoming to most figures.

Black with crepe with asparagus, brown with turquoise blue, purple-blue clifton, crepe marocain in puffy belt and cañon crepe in terracotta pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

Problems Poultry Men

Have Not Solved

Why Eggs Should Differ According To When They Are Laid

Why should eggs laid in January, February, and March, make light cakes, and eggs laid in May, June and July make heavy, soggy cakes? Why should eggs laid in March give a low percentage of chickens as compared with eggs laid in January, February, April or May?

These were some of the unworked problems mentioned by Professor R. K. Baker, head of the poultry department at the University of Saskatchewan and producers of the chicken's champion hen, in his discussion at the University of Saskatchewan the Canadian Society of Technical Agriculturists on "some discoveries that have affected poultry breeding."

Discoveries regarding vitamins had made the 300-egg hen possible. Leg weakness, partial paralysis and crooked keel bones were becoming rare since vitamins had been studied and the birds were getting sprouted oats, cabbage, carrots and cod liver oil.

X-ray experiments on eggs were giving interesting results. A short exposure is said to improve the hatching percentage of the eggs. An exposure of 15 to 20 minutes is said to increase the rate at which eggs grow after hatching. An exposure of several hours is said to affect the sex ratio of chicks so that more of the chicks are females.

When the University of Saskatchewan flock was started in 1911 the laying average was less than 100 eggs per hen. By 1926 it was over 175 eggs. Last year's average has only been worked out for one family. The 44 daughters of one bird average 217 eggs. There was not a poor bird in the family. The 358-egg champion came from another family.

Colour Indicates Real Grade

Maple Sugar Or Syrup Of Light Color Is The Best Grade

The maple sugar industry is one of the oldest known to this continent. It was brought to the early settlers by the native Indian and today is of outstanding commercial interest. The Canadian Department of Agriculture finds that quality in maple sugar and syrup is clearly indicated by colour. The grading rule is the lighter the product the better its quality. Grade 1 is very light in colour, corresponding closely to clover honey in appearance. Grades 2 and 3 are perceptibly darker, while Grade 4 corresponds quite closely to the colour of buckwheat honey. Quality counts in maple products as in everything else.

Completing Dairy Survey

Dr. Muenzer, of Cornell University, N.Y., has returned to his work, after completing the field work of a survey of the dairy industry of Saskatchewan. J. K. Finlayson, of the Saskatchewan Milk Producers' Branch, has gone to Cornell with him, where he will complete the summarization of the facts and figures, which will occupy about two months.

Nearly 30,000 tons of beans were shipped daily during the season, being harvested season in southern China.

COLONEL W. G. BARKER, V.C., D.S.O., M.C.

The photograph here shows Col. W. G. Barker, V.C., D.S.O., M.C., with bar, who was instantly killed in Ottawa, when his aeroplane stalled at a low altitude and crashed to the ground. Col. Barker was one of the greatest of Canada's war sons, having 52 enemy aeroplanes to his credit.

Three Hundred Millions Spent By American Tourists In Canada During Year 1929

Hard Legal Problem

English Magistrates Puzzled Over Definition Of "Farmer"

What is a farmer? Hundreds of people who gain their livelihood from their own land in the counties of England are affected by that legal question.

Large sums of money, too, are involved, for dependent on the answer to that legal question, is the amount of rates which may, or may not, have to be paid by the men and women who consider themselves "farmers" in the legal sense.

Is, for example, a bee-keeper a farmer? Can a keeper of chickens be called a farmer?

One side of the difficulty has been settled by the Oxfordshire Quarter Sessions, considering a rating appeal—the first case of its kind. The magistrates at the Oxford County Hall decided that a bee-keeper was a farmer, and, as such was entitled to have his home rated as a "farmhouse."

Christopher Bartlett, of Sandford Mount, Charlbury, appealed to the quarter sessions against the assessment of his house, because he was a bee-keeper. His house had been assessed at £100, whereas he maintained that as a farmhouse the assessment should not be more than £40.

"He is the largest bee-farmer in England," said E. Gorst, counsel for Mr. Bartlett. "His home has been assessed as a country house, whereas it is really a house in which an agricultural holding and is therefore a farmhouse in fact."

Dr. Robert, counsel for the rating authority, and one of the foremost barristers on the Oxford circuit, submitted that bee-keeping was not farming. R. T. Barrie, the rating officer for the Chipping Norton Council, gave evidence that, in his opinion, £100 was the fair and proper assessment for Sandford Mount. Eventually the magistrates upheld the appeal of Mr. Bartlett, and fixed the assessment of his home at £60—a reduction of £40 from the former rateable value.

Publicity Play Show

Exhibits Will Be Displayed At World Poultry Congress

World Poultry Congress and Congress, to be held in Regina, in 1932, has obtained exhibition space at the World Poultry Congress, to be held in London, this year, at Crystal Palace, London, England. Oscar Turcott, Canadian Exhibition manager, London, England, will arrange the display that will occupy a square with 576 square feet of space at the entrance to Crystal Palace.

The World Poultry show will have the display of grain and other crops to be exhibited in Regina situated in the commercial section of the displays at the World Poultry Congress, and announcements of the World Poultry Congress, such as being distributed in Regina, will be distributed from the exhibit space to delegates from all parts of the world attending the congress.

Similar exhibitions of grain and associated crops will be made at Antwerp, Paris and Buenos Ayres under the personal direction of Mr. Turcott.

Plant Clean Seed

Need For Planting Clean Seed This Year Is Greater Than Ever

Before You may not always be able to afford finest quality registered seed for planting, but you can always afford to plant clean seed. The seed branch of the Dominion Department of Agriculture are urging the planting of clean seed this year more than ever before—clean seed pays, particularly with the weed menace resulting the alarming proportions it does in many parts of Canada today.

There are many effective ways of cleaning seed, depending upon the quantity to be cleaned, location and equipment. In many parts of Canada seed cleaning machinery is readily available for the purpose, while in others suitable screens can be adapted to the flanning mill, and in some of the more remote sections the old pioneer method of wind-cleaning is always available.

"To attain happiness," says a lecturer, "one must vibrate in tune with one's environment."

According to that, a man with St. Vitus Dance at a jazz concert would be in perfect bliss.

A first edition copy of Dickens' "Great Expectations" was sold recently in London, for \$1275.

Gold from the south washes over the international boundary in great waves as soon as the tourist season begins. The year 1929, for which figures were just made public, was the best on record. Practically 300 millions were spent in Canada last year by tourists.

Canadian tourists in other countries, mainly the United States, were also generous with their cash, keeping in mind the Dominion's small population. One hundred and eleven millions were spent by Canadians in other countries, according to bureau of statistics estimates.

The balance of tourist business in Canada's favor, amounting to some 189 millions, was twice as great as the adverse trade balance (visible balance) for 1929.

The expenditure grows by leaps and bounds. Automobile tourists from the United States spent \$25,000,000 more last year than in 1928, and steamer and train tourists another \$8,000,000 more.

When tourists' expenditures are added to "visible" trade figures with the United States, expenditures here equal the Canadian expenditure there to imports, the present difference of \$350,000,000 in favor of the United States is cut in half.

Less than a decade ago (1920) the expenditures of tourists in Canada was calculated at \$83,000,000.

Oldest Trainman

Canada's Oldest Trainman Celebrates Birthday At Truro, N.S.

Claimed to be Canada's oldest trainman, Robert Williams, of Truro, N.S., rounded out the ninety-one mark on March 1st. He was born at West River, Antigonish County, Nova Scotia, March 1, 1839, and when seventeen years old got a job on the construction of the first Nova Scotia Railway. Feeling the call of the sea, he joined a sailing vessel and rounded "The Horn." On a trip from Liverpool, England, with troops for a far-off station, his ship was wrecked while rounding "The Horn," and he was among the 49 saved. Once he fell forty feet from the rigging and broke an arm and also injured an eye. In the early twenties he decided to give up the sea, and in 1874, joined the service of the Intercolonial Railway, now part of the Canadian National Railway System, and retired on pension in 1910, at the age of seventy-one.

Russian Bees Singless

Entomologists Have Proved This After Three Years' Experiment

That everything from Russia is not dangerous was established with the announcement that Russian bees do not sting. This was the result of three years' experimenting at the agricultural station at New Brunswick.

The bees from Russia produce as much honey as Italian bees, but swarm less frequently. It was during the entire experimentation period neither Ray Hutton nor H. P. Diggers, entomologists at the station, ever were stung.

Earned His Pudding

Flloyd Wille, of Los Angeles, claims the world record or whatever it might be called for staying buried six feet in the ground in a box with a six inch pipe and a telephone for outside connections for 391 hours, and no one has been found so far who does not agree that he is welcome to it. Floyd was buried Feb. 27 with nothing for company but a telephone.

"You will suffer poverty until you are sixty-five."

"And then... and then?"

"You will have got to die."

"You said I was a rogue, a liar, a swindler—I have proofs of it." "Then you know what I said is true." — The Holy Hail Tanna, Golanberg.

Here and There

(1929)
Speaking on Canada's stake in the Pacific before the Montreal Canadian Club recently, Hon. Newton W. Rowell, vice-chairman of the Canadian Institute of International Affairs, took occasion to compliment Canadian Pacific Steamships on their work on that ocean. He said: "There are many lines of steamers plying from North America to the Orient and one of the best is still the Canadian Pacific Steamship; there is no other freight and passenger service on the Pacific that is equal to that of the Canadian Pacific Company. We owe a great deal to that institution in developing trade."

Visiting sportsmen coming to New Brunswick for hunting and fishing have almost doubled in the past five years, according to figures given out by Hon. G. H. Prince, Deputy Minister of Lands and Mines of the province.

Additional air mail service was inaugurated between Winnipeg, Calgary and Edmonton early in March by the Canadian Post Office Department, leaving only the Rocky Mountains and the Pacific Coast and from western Ontario to Winnipeg unserved by air mail. It is expected that at least a portion of this territory will be linked during the coming summer.

Preparations are being made for taking another decennial census in Canada which is due in 1931. The census will give employment to 35,000 persons. It was first taken in 1871 and has been taken every ten years since then.

READ THE ADVERTISEMENTS

About Town and Country

Mr. Chester E. Moffat, who was the first member of the Oyen News staff in 1914, passed his examination in Edmonton last week as an air pilot.

Mr. F. E. Neld and family are moving from town to their farm this week.

Mr. William Caswell of Calgary was an Oyen visitor over the week end when he was the guest of his mother and brother. He returned to Calgary on Monday.

Mrs. A. O. MacArthur arrived in Oyen yesterday from Toronto to make her home here with her husband and son, during the spring and summer work at the Fuego oil field.

Mr. J. J. Kelly left yesterday on a business trip to Calgary.

Mrs. J. Love, who has been visiting her daughter Mrs. F. Grant at Munson, returned to Oyen last Saturday.

Several second hand drills, in good shape. For sale, cash or trade.—W. V. Miller, Oyen.

Mr. R. B. Lowe left last Saturday on a business trip to Calgary.

The Johnson Garage has just completed the redecoring of their front office, including painting in a new metallic coloring.

Don't forget the visit of the Richard Kent Stock Co., at Oyen Theatre, Thursday, April 10. They will present the stage play "The Notables," a story written about the claim holders of early days.

About twenty cars visited the Fuego oil well from Oyen last Sunday afternoon, as well as many from other points in the district.

Mr. J. T. Smith who has been spending the winter months at the coast, returned to Oyen last Monday.

Mrs. J. Long entertained a few friends at cards last Friday evening.

A "Pot Luck" supper, served by the ladies aid last night in the basement of the United Church, was well patronized. Following the serving of an excellent supper a short program was rendered by Messrs Robert Nisbet, A. J. Fannell, W. R. Cutler, H. Austin, H. E. Bradford, E. Ihde and W. Owens, in the form of a melody of old time songs, assisted by Mrs. F. E. Neld, accompanist.

Miss Helen Gripp who left recently to visit her aunt Mrs. Roy Lawson at Drumheller, was operated on for appendicitis at the Drumheller hospital.

Mr. and Mrs. John Gripp, received word by telephone last Saturday that an operation would be necessary, and left by motor for Drumheller, accompanied by Mr. and Mrs. Lindvall. Latest word from the hospital is to the effect that the patient is doing as well as can be expected. Mrs. Gripp remained in Drumheller to be with her daughter.

Dial's Auction Sales

Sale of 8 head of work horses, farm machinery, harness etc. at the farm of J. H. Ketchum, N.E. 1/4, Sec. 5, Twp. 27, Rge. 13, (7 miles south and 1 mile east of Landline) on Wednesday, April 3. Sale to commence at 1:30 p.m. Terms Cash. B. H. Dial, auctioneer.

Automobile License Plates

Automobile License Plates for 1930 may be had upon application to F. C. Bliss, at the Village office. Supply now on hand.

Born—To Mr. and Mrs. W. N. Stevenson of Benton, Alta., on Wednesday, March 10, 1930, a son.

Born—To Mr. and Mrs. David A. Peck of Oyen, on Saturday, March 29, 1930, a daughter, Barbara Edith.

Born—To Mr. and Mrs. Howard Munroe of Oyen, on Tuesday, April 1, 1930, a son.

Born—To Mr. and Mrs. William Campbell of Oyen, on Sunday, March 30, 1930, a son.

Mr. Louis O'Reilly of Oyen, was a business visitor in Calgary last week, returning to town Monday.

Mr. J. J. Purcell left this morning on a business trip to Calgary.

Considerable interest was shown in the John Deere tractor or school, sponsored by the J. L. Acheson Hardware, which was held in the Masonic Hall, Oyen, last Thursday. Those who attended were well pleased with the instruction given.

Mr. Chard, field service man for the wheat pool, and Mr. R. Cates of Oyen, conducted meetings in Excel and Landline, last Wednesday night and Thursday afternoon, respectively, when lantern slides and addresses were given, illustrating the operations of the pool. There was a good attendance at each meeting.

A meeting of the Women's Auxiliary was held at the home of Mrs. James Lees, Wednesday April 2, when it was decided to hold a sale of home cooking and afternoon tea at the home of Mrs. A. Campbell on the last Saturday in April, (April 26).

April Supper

We went to the Ladies Aid supper, at the Union Church, April evening. It was served on the first floor and was a very good supper.

This day in a square meal we're stog-

ing. The transition month we call it. As our hopes to all April are clinging Like a glimpse from an above, and after the pastor was saying.

His grace at the table for all. We ate the best food—no delaying. And we now may feel fine up till fall.

Sure the Ladies Aid ladies know trading. As the food that we ate they're free,

Then changing themselves up. Trading. From paying five times same as we. To fingers in April girls dresses.

Well finger, each hosts as we'll say. Go-yip while April days pass. Then April for all makes a way.

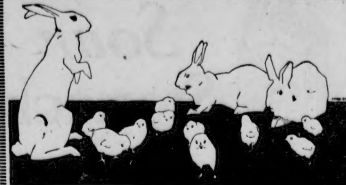

—ANDREW OYEN.

SUBSCRIPTIONS—To the following magazines are taken at the office of the Oyen News: "Maclean's," Canada's National magazine, \$2.00 a year, or \$3.00 for three years.
